

WIDEWATER GAS PLANT

In May 2001, ATCO Midstream acquired the Widewater Gas Plant and associated gathering and transportation pipelines.

The Widewater facility, located west of the town of Slave Lake, Alberta, is in an area which previously had no gathering and processing facilities. ATCO Midstream works with area producers to find solutions to expediently and economically tie-in and process gas at the facility.

Widewater has over 46 km of 114 mm gathering pipelines and continues to extend the capture area, bringing new production to the plant.

FACILITY SPECIFICATIONS

LOCATION:	6-08-73-07 W5M
PROCESSES:	Gas gathering Gas compression Refrigeration
LICENSED CAPACITY:	282 10 ³ m ³ /day (10 mscfd)
INLET PRESSURE:	1,035 kPa to 5,500 kPa (150 psi to 800 psi)
DELIVERY PRESSURE:	Up to 9,000 kPa (1,300 psi)
DELIVERY POINT:	TransCanada Transmission via Mitsue plant interconnect
